LIVING ROOM: What kind of activities should an architect keep in mind while designing a Living room.

Method:

Three types of houses are taken and activities **which happen/can happen** in a Living room.

Design of a Living-room is based on an architect and user itself, But Architect's role is to pre-conceive the configuration of furniture, the activities and to design spaces accordingly.

**While Entering the house,
what all spaces should one
see from the entrance?**
